

StoryCast

Accessible Audio & Video Storytelling Microsite

Research, Design & Technical Documentation

Author: Tito SIbo

Course: Advanced Frontend

Project Overview

StoryCast is an accessible digital storytelling platform that showcases inspiring video stories featuring young African innovators, women in technology, and community changemakers. Its mission is to deliver meaningful and engaging content while ensuring that users of all abilities can access and interact with the stories seamlessly.

The platform emphasizes inclusive design and modern web development practices by incorporating semantic HTML5, responsive layouts, Sass, CSS Grid, and Flexbox. By prioritizing accessibility and usability, StoryCast aims to create an enjoyable experience for everyone, regardless of device or ability.

Page Descriptions

Home Page

The Home page introduces StoryCast and showcases featured stories from inspiring African voices. It provides clear navigation and a simple, accessible layout that helps users quickly discover content.

Story Detail Page

The Story Detail page focuses on a single story, providing video or audio content alongside transcripts and related stories. Its design ensures that everyone can fully experience and engage with the content.

About & Accessibility Page

This page explains the mission behind StoryCast and highlights the accessibility features built into the platform. It also encourages users to connect with the community and share feedback.

Tools Used

Tool	Purpose
HTML5	Semantic page structure
Sass / SCSS	Styling with partials, tokens, BEM
Vanilla JavaScript	Interactivity — no frameworks
CSS Grid + Flexbox	Responsive layout
CSS Container Queries	Component-level responsiveness
Public Sans (Google Fonts)	Typography

Tool	Purpose
Material Symbols (Google)	Icons
draw.io	Sitemap diagram
Figma	High-fidelity mockups
VS Code + Live Server	Local development
Pexels / Unsplash	Free stock images and video
Pixabay Music	Royalty-free audio

Conclusion

StoryCast was designed with accessibility and inclusivity at its core. By combining semantic HTML5, Sass, and responsive layouts, the platform delivers meaningful stories in a way that is easy to navigate and enjoyable for all users. The project demonstrates how thoughtful design and modern web practices can create a better experience for everyone.
